What is public speaking?

Public speaking (also called oratory or oration) is the act of speaking face to face to a live audience. However, due to the evolution of public speaking, it is modernly viewed as any form of speaking (formally and informally) between an audience and the speaker.

What are the qualities of successful public speaker?

Whether it is in front of a group of people you already know or a crowd of complete strangers, your ability to communicate to them with clarity and confidence is known as your public speaking skills. There may or may not be an opportunity for interaction between the speaker and audience.

What are the essential points for public speaking?

The function of public speaking depends entirely on what effect a speaker intends when addressing a particular audience. The same speaker, with the same strategic intention, might deliver a substantially different speech to two different audiences. The point is to change something, in the hearts, minds or actions of the audience.

Despite its name, public speaking is frequently delivered to a closed, limited audience with a broadly common outlook. Audiences may be ardent fans of the speaker; they may be hostile (attending an event unwillingly); or they may be random strangers (indifferent to a speaker on a soap box in the street). All the same, effective speakers remember that even a small audience is not one single mass with a single point of view but a variety of individuals.

As a broad generalisation, public speaking seeks either to reassure a troubled audience or to awaken a complacent audience to something important. Having decided which of these approaches is needed, a speaker will then combine [information](#) and [storytelling](#) in the way most likely to achieve it.
